

Decision Requirement Diagram

Elements

cHour (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cHour

Date-Time2.hour

Time2 (Decision)

Output Data Type

Type	Time
------	------

Decision Logic (Boxed FEEL Expression)

Time2
time(Date-Time2)

cMinute (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cMinute
Date-Time2.minute

cYear (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cYear
Date.year

hoursInDuration (Decision)

Output Data Type

Type	Number
------	--------

Decision Logic (Boxed FEEL Expression)

hoursInDuration

`duration(dtDuration2) / duration(oneHour)`

ymDuration2 (Decision)

Output Data Type

Type	Days and time duration
------	------------------------

Decision Logic (Boxed FEEL Expression)

ymDuration2

`years and months duration(Date-Time2,Date-Time)`

cSecond (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cSecond

`Date-Time2.second`

cMonth (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cMonth	
Date.month	

cOffset (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cOffset	
Date-Time2.timezone	

☐ **oneHour (Input Data)**

Output Data Type

Type	Days and time duration
------	------------------------

Date-Time2 (Decision)

Output Data Type

Type	Date and time
------	---------------

Decision Logic (Boxed FEEL Expression)

Date-Time2	
date and time(Date.fromString,Time)	

dtDuration2 (Decision)

Output Data Type

Type	Days and time duration
------	------------------------

Decision Logic (Boxed FEEL Expression)

dtDuration2

```
date and time(Date-Time) - date and time(Date-Time2)
```

cDay (Decision)

Output Data Type

Type	Text
------	------

Decision Logic (Boxed FEEL Expression)

cDay

```
Date.day
```

☐ Year (Input Data)

Output Data Type

Type	Number
------	--------

Date (Decision)

Output Data Type

Type	tDateVariants
------	---------------

Decision Logic (Boxed Context)

Date	
fromString <i>(Date)</i>	date(dateString)
fromDateTime <i>(Date)</i>	date(Date-Time)
fromYearMonthDay <i>(Date)</i>	date(Year,Month,Day)

Date-Time (Decision)

Output Data Type

Type	Date and time
------	---------------

Decision Logic (Boxed FEEL Expression)

Date-Time
date and time(dateTimeString)

sumDurations (Decision)

Output Data Type

Type	Days and time duration
------	------------------------

Decision Logic (Boxed FEEL Expression)

sumDurations
duration(dtDuration1) + duration(dtDuration2)

years (Decision)

Output Data Type

Type	Number
------	--------

Decision Logic (Boxed FEEL Expression)

years
dtDuration1.years

Time (Decision)

Output Data Type

Type	Time
------	------

Decision Logic (Boxed FEEL Expression)

Time
time(timeString)

☐ Month (Input Data)

Output Data Type

Type	Number
------	--------

dtDuration1 (Decision)

Output Data Type

Type	Days and time duration
------	------------------------

Decision Logic (Boxed FEEL Expression)

dtDuration1
duration(durationString)

☒ **seconds (Decision)**

Output Data Type

Type	Number
------	--------

Decision Logic (Boxed FEEL Expression)

seconds
dtDuration1.seconds

☐ **dateString (Input Data)**

Output Data Type

Type	Text
------	------

☐ **timeString (Input Data)**

Output Data Type

Type	Text
------	------

☐ **dateTimeString (Input Data)**

Output Data Type

Type	Text
------	------

☐ **Day (Input Data)**

Output Data Type

Type	Number
------	--------

☐ **durationString (Input Data)**

Output Data Type

Type	Text
------	------

☒ **Time3 (Decision)**

Output Data Type

Type	Time
------	------

Decision Logic (Boxed FEEL Expression)

Time3

`time(Hours,Minutes,Seconds,Timezone)`

☐ **Hours (Input Data)**

Output Data Type

Type	Number
------	--------

☐ **Minutes (Input Data)**

Output Data Type

Type	Number
------	--------

☐ **Seconds (Input Data)**

Output Data Type

Type	Number
------	--------

☐ **Timezone (Input Data)**

Output Data Type

Type	Text
------	------
